

DIESEL EMISSION INSPECTION PROGRAM

Thank you for your expression of interest regarding the State of New Jersey Diesel Emission Inspection Program and the requirements for licensure as a New Jersey Diesel Emission Inspection Center.

In order to initiate the licensing process, we are providing an overview of the program and the general requirements for licensure. This overview includes a brief history of the program and a Business License Application Package. Please note on the application that a check-off feature exists to denote interest as a Diesel Emission Inspection Center or a Fleet Diesel/Emission Inspection Center.

Please follow all instructions carefully. Should you have any questions concerning the licensing requirements and/or the program, please do not hesitate to contact:

DIESEL EMISSION INSPECTION CENTER LICENSE INFORMATION

GENERAL

The Division of Motor Vehicles and the Department of Environmental Protection have established a Diesel Emission Testing program for heavy-duty diesel trucks, diesel buses and certain other diesel powered vehicles. The annual testing program will be conducted at licensed diesel emission testing centers. Diesel emission testing centers are licensed to conduct emission inspections and certifications for heavy-duty diesel trucks, diesel buses and diesel powered motor vehicles and have the option to register with the division as diesel emission repair facilities. A Diesel Emission Inspection Center (DEIC) license authorizes the center to conduct inspections and certifications in all diesel emission categories as required by State standards and to certify a vehicle for approval or rejection.

A Diesel Emission Inspection Center in the first year of the program will be authorized to make repairs or correct emission control defects. Upon renewal of the initial DEIC License, an inspection facility would be required to register as an Emission Repair Facility (ERF) and pay a biennial registration fee of \$50.00 to continue to qualify as an Emission Repair Facility.

Two (2) Diesel Emission Inspection Center Licenses are available. The first license is issued to diesel emission inspection centers to provide annual inspection certifications, and repair services (if registered), for heavy-duty diesel trucks (18000 lbs) diesel buses, and diesel powered vehicles with a gross vehicle weight rating exceeding 8500 lbs.

The second type is a Fleet Diesel Emission Inspection Center License. This license is issued to owners or lessees of fleets of 25 or more heavy-duty diesel trucks, diesel buses, and diesel powered vehicles to perform annual inspection certifications and repairs of such vehicles (if registered). An applicant must have the facilities, equipment and experience required of a regular Diesel Emission Inspection Center.

The fleet license will allow the licensee to contract with other fleet owners or licensees to perform their annual inspections, certifications and repairs (if registered) but the licensee has the responsibility for insuring that all repair services contracted for are performed at state registered facilities and meet all state standards. The license does not permit fleet owners to perform these services for the general public.

A Diesel Emission Inspection Center may conduct business as a test only or a test and repair facility. All diesel emission test and repair facilities must meet all facility equipment and employee training and experience requirements denoted under applicant requirements. All applicants wishing to register as an Emission Repair Facility will be required to pay an additional \$50.00 biennial registration fee which will be required upon renewal or one year after initial application.

Included in this package are the regulations governing Diesel Emission Inspection Center Licensing. Please review the regulations as you prepare your license application. If you have questions, the following individuals will assist you:
